

Quality, Occupational Health & Safety and Environmental Policy

Quality, Occupational Health & Safety and a Sustainable Environment, are at the top of our agenda; they are behind everything we do here at the Movianto group. We work to the very highest standards when carrying out our logistics, transport, pharmaceutical, IT and financial services on behalf of our clients. With our one-stop shop, clients benefit from a wide range of services with high value added. We have a proactive environmental policy and our agility is a vital part of our DNA, meaning we can anticipate and meet the needs of our clients. We are also committed to ensuring healthy and safe working conditions for our employees and external contractors.

We are a key player in the supply chain and healthcare sector. We encourage our employees to look for continuous improvement in our processes in order to achieve results way beyond the wishes of our clients, the supervisory authorities, our partners and our investors.

We enforce an integrated robust Quality, Occupational Health & Safety and Environmental management system. Whatever we do, we do it well, and we do everything we can to do it even better. Traceability, security and innovation are the big issues that we deal with every single day.
